

# At Home. . .

**Believe it or not, the average home is full of dangers that often go unnoticed. In fact, accidents involving common household products cause 125,000 eye injuries each year.**

**Ninety percent of these eye injuries can be prevented through understanding safety practices, and the use of proper eye protection.**

- Use safety gates at the top and bottom of stairs.
- Provide lights and handrails to improve safety on stairs.
- Pad or cushion sharp corners and edges of furnishing and home fixtures.
- Install cabinet and drawer locks in kitchens and bathrooms.
- Store personal-use items (cosmetics, toiletry products), kitchen utensils, and desk supplies where they are out of reach for children.
- Inspect and remove debris from lawns before mowing.
- Keep paints, pesticides, fertilizers, and similar products properly stored in a secure area.
- Keep your tools in good condition; damaged tools should be repaired or replaced.
- Wear safety glasses or dust goggles to protect against flying particles, and chemical goggles to guard against exposure to fertilizers and pesticides.
- Wear chemical safety goggles when using hazardous solvents and detergents.
- Read and follow all manufacturer instructions and warning labels.
- Do not mix cleaning agents.
- Know that regular eyeglasses don't always provide enough protection.
